Our Journey Since Inception

Qode Principles

Data-driven, not Gut-driven

Emotions and biases have no place in our investment decisions. We systematize every decision with rigorous data analysis, ensuring objectivity and eliminating guesswork

Cause & Effect over Coincidence

Finding a pattern without understanding its cause is like navigating without a map—you might get somewhere, but you'll likely be lost. We blend quantitative models with sound economic principles to understand the "why" behind every investment. It's not just about spotting trends; it's about knowing what drives returns and optimizing risk

Bold & Unconventional Approach

We are not afraid to explore uncharted territory. We seek opportunities where others don't dare to look, making bold investments in unconventional places. We don't limit ourselves to traditional asset classes or standard practices—our goal is to deliver the highest risk-adjusted returns, no matter what we have to unlearn and relearn

Transparency Builds Trust

We don't just manage money; we steward trust. By embracing integrity, transparency, and unwavering dedication to our clients' best interests, we ensure every decision strengthens the bond of confidence we share. Your trust is our most valuable asset, and we honor it daily
