

Objective

QTF is a dynamic strategy that shifts between high-risk assets (equity) and low-risk assets (debt/gold) using proprietary timing models. The aim is to capture equity gains during favourable periods while protecting drawdowns during downturns. It is designed for investors seeking active risk management without compromising long-term returns.

Structure Discretionary PMS	Inception Date 28th November 2024	Minimum Investment ₹50 Lakhs	AUM ₹51.62 Crores
Fund Manager Rishabh Nahar	Benchmark NIFTY Midcap 150	Average Market Cap N/A	Number of Holdings N/A
