What Is Quant Investing?

Markets are full of noise, emotions, and opinions. Quant investing cuts through that noise by turning data into decisions. Instead of relying on hunches, it uses mathematics, statistics, and technology to uncover patterns that humans often miss. Every decision is rule-based, disciplined, and tested across time, ensuring bias is minimized. The result is a consistent and systematic approach to building wealth where science meets investing.

Qode at a Glance

Key Highlights

ASSETS

₹ 1000+ Cr

Managing over ₹333 Crs in PMS and ₹538 Crs across SMAs and Advisory

Regular audits and transparent reporting for accountability

Our Journey

Founders

Karan Salecha

Partner & Principal Officer

- 10+ years in crafting high risk adjusted return investment strategies.
- 6+ years in portfolio curation and advisory based on investor risk profiles.
- Postgraduate degree from the Institute of Chartered Accountants of India.

Rishabh Nahar

Partner & Fund Manager

- 8+ years in equity and quant research, leveraging models and data analytics for market insights.
- Experience building proprietary algorithms to optimize across asset classes.
- Holds a finance degree and is a self-taught coder.

Kavan Sejpai

Partner & Fund Manager

- 11+ years of consistently high risk-adjusted returns with zero negative years.
- Experience in research and strategy for renowned firms like Franklin Templeton and MSD Capital.
- 14 years in investment strategy and asset allocation (buy-side).

Gaurav Didwania

Partner & Fund Manager

- 15+ years in the finance industry, focused on investment management and advisory.
- Proven track record of delivering exceptional returns.
- Holds a Bachelor of Management Studies (BMS) from NM College, Mumbai.

Our Investment Philosophy

1

Data-driven, not Gut-driven

Emotions and biases have no place in our investment decisions. We systematize every decision with rigorous data analysis, ensuring objectivity and eliminating guesswork.

2

Cause & Effect over Coincidence

Finding a pattern without understanding its cause is like navigating without a map—you might get somewhere, but you'll likely be lost. We blend quantitative models with sound economic principles to understand the “why” behind every investment. It's not just about spotting trends; it's about knowing what drives returns and optimizing risk.

Bold & Unconventional Approach

3

We are not afraid to explore uncharted territory. We seek opportunities where others don't dare to look, making bold investments in unconventional places. We don't limit ourselves to traditional asset classes or standard practices—our goal is to deliver the highest risk-adjusted returns, no matter what we have to unlearn and relearn.

4

Transparency Builds Trust

We don't just manage money; we steward trust. By embracing integrity, transparency, and unwavering dedication to our clients' best interests, we ensure every decision strengthens the bond of confidence we share. Your trust is our most valuable asset, and we honor it daily.

Strategies

ETF - Only

Core Equity

Qode All Weather (QAW)_{TM}

Permanently diversified "sleep-well" mix of equities and gold for capital preservation.

Qode Tactical Fund (QTF)_{TM}

Momentum-driven shifts in exposure, designed for offense with built-in airbags.

Qode Growth Fund (QGF)_{TM}

High-quality, factor-screened portfolio aiming for quality-seeking growth.

From Capital Preservation to High-Conviction Growth

Two-Layer options framework

LAYER 1

Put Protection

Dynamic Put Timing

- Captures macro downtrends
- Eliminates bleed of continuous hedging
- Protects against major market crashes
- Capital-neutral over full cycles

LAYER 2

Hedging the Hedge

Micro-Trend Capture

- Hedges the Put Protection layer
- Captures shorter-term market movements
- Transforms hedging into alpha generation
- +10.46% cumulative return (standalone)

Combined Result: **Nifty 50 portfolio grows from 100 → 447** vs 214 for buy-and-hold (~2.1x outperformance)

Put Protection

Our proprietary timing model activates puts only when macro conditions signal elevated risk - eliminating the bleed of continuous hedging.

Puts are bought only when signal triggers.

Capital preservation with effective crash protection. The strategy stays flat in normal markets and profits during downturns.

VSI Regimes & Distribution

How markets spend their time across valuation zones - and what each zone implies for investors

VSI	REGIME	WHAT IT MEANS	ACTION	TIME
70 – 100	Extreme Fear	Markets extremely expensive. Very high probability of below-average multi-year returns. Minimize equity exposure.	Minimum equity allocation	8.3%
50 – 70	Elevated Risk	Valuations above average. Forward returns compressed. Begin reducing equity exposure and increasing defensive positioning.	Underweight equities	51.3%
30 – 50	Low Stress	Valuations below historical average. Above-average forward returns likely. Favorable risk-reward for incremental equity deployment.	Overweight equities	28.1%
0 – 30	Extreme Calm	Markets deeply undervalued. Historically the best time to deploy fresh equity capital aggressively. Occurs during panic selloffs and prolonged bear markets.	Maximum equity allocation	12.3%

Segment-wise Forward Returns

LARGECAP VSI	1-YEAR FWD RETURN	3-YEAR FWD CAGR	1Y HIT RATE (POSITIVE)
0 - 40	+44.10%	+16.40%	100.00%
40 - 55	+21.00%	+15.60%	92.00%
55 - 70	+11.40%	+11.60%	89.60%
70 - 100	+2.90%	+10.10%	52.00%

SMALLCAP VSI	1-YEAR FWD RETURN	3-YEAR FWD CAGR	1Y HIT RATE (POSITIVE)
0 - 30	+96.01%	+34.70%	100.00%
30 - 50	+26.90%	+24.80%	69.90%
50 - 70	+19.20%	+17.80%	67.20%
70 - 100	+5.00%	+6.30%	44.00%

MIDCAP VSI	1-YEAR FWD RETURN	3-YEAR FWD CAGR	1Y HIT RATE (POSITIVE)
0 - 30	+72.40%	+30.70%	100.00%
30 - 50	+31.80%	+25.10%	83.50%
50 - 70	+20.70%	+19.50%	81.30%
70 - 100	+5.60%	+10.40%	52.00%

MICROCAP VSI	1-YEAR FWD RETURN	3-YEAR FWD CAGR	1Y HIT RATE (POSITIVE)
0 - 30	+75.90%	+42.50%	90.90%
30 - 50	+10.20%	+26.30%	60.20%
50 - 70	+23.10%	+8.80%	62.50%
70 - 100	+2.10%	-9.70%	47.10%

Data is backtested from Jan 2011 to Mar 2026.

Forward Returns by VSI Zone

NIFTY 50				QODE ALL WEATHER		
VSI ZONE	1-YEAR FWD RETURN	3-YEAR FWD CAGR	1Y HIT RATE (POSITIVE)	1-YEAR FWD RETURN	3-YEAR FWD CAGR	1Y HIT RATE (POSITIVE)
0 - 30	+33.30%	+15.90%	99.70%	+23.50%	+18.70%	100.00%
30 - 50	+11.40%	+14.20%	84.90%	+18.40%	+18.70%	99.70%
50 - 70	+10.10%	+10.20%	72.20%	+16.10%	+15.90%	81.30%
70 - 100	+4.20%	+9.50%	79.30%	+16.80%	+19.70%	100.00%

We see that the VSI improves the returns for the Nifty 50 significantly, but that QAW shows robust returns overall, irrespective of the valuations of the market.

* Hit Rate implies the % of times the security has given positive returns in the given period.

Data is backtested from Jan 2011 to Nov 2024 and live from Nov 2024 to Mar 2026.

Proactive Derivative Hedging

We're among the very few PMS providers who actively use derivative hedging—not just to boost returns, but to safeguard your portfolio when markets turn volatile. This means your investments are far more resilient during unpredictable times, helping you sleep better at night.

Deep Alignment With Investors

Our founders and their families have a significant stake invested in the same strategies we offer to our clients. For us, it's not just about managing your wealth—it's about growing ours together. Your success genuinely matters to us, because we're in it right alongside you.

Why Invest with Us

Curated, Research-Driven Strategies

Everything we do is built on rigorous research, smart models, and firsthand conviction—not short-term trends. We take pride in discovering the next big opportunity and offering specialized strategies you won't find elsewhere. Our approach is focused, passionate, and all about creating lasting wealth.

Flexible Combinations of Four Specialized Strategies

We help you select a single strategy or a thoughtfully curated combination from our four specialized offerings—so portfolios are always matched to distinct goals and aspirations.

Fee Structure

PARTICULARS	OPTION 1	OPTION 2	OPTION 3
Fixed Fee	1.50%	0%	2.50%
Performance fee	15%	20%	0%
Hurdle Rate	10%	0%	0%
High Watermark	Yes	Yes	No

Investor can choose between Options 1, 2 & 3

1

No Redemption Fee:
You won't be penalized for exiting, if you need the funds, we trust it's for a good reason.

2

Fixed Fees:
Calculated on daily average AUM & charged quarterly

3

High Watermark:
Performance fees apply only when the fund surpasses its previous peak value.

4

No Lock-Ins: We trust the strategy. You decide the journey.

5

Hurdle Rate: Performance fees apply only when returns are above a minimum benchmark

Who We Are

Qode is a SEBI-registered Portfolio Management Service (PMS) built on the principle that evidence, not opinion, should drive investment decisions. Founded by seasoned professionals with over a decade of experience in Indian markets, we exist to give investors a disciplined, transparent, and performance-oriented platform for long-term wealth creation.

What We Do

We design and manage differentiated investment strategies that combine the power of quantitative models with the insight of fundamental research. Our range spans ETF-only portfolios, systematic momentum strategies, diversified growth funds, and high-conviction stock picks—offering clients the flexibility to align with their goals and risk appetite.

How We Work

At Qode, every investment decision is guided by data, tested frameworks, and structured review processes. We believe in clarity over complexity: our clients receive concise updates that explain what we hold, why we hold it, and when we make changes. With bank-grade custody, strong operational controls, and a proactive investor support team, we ensure the experience is as robust as the strategy itself.

Why It Matters

Markets are noisy and narratives change quickly. Qode’s approach is designed to cut through that noise. By combining
